

Mass Audubon Day Camps

If your child is too young for overnight camp or would like to continue exploring nature after returning home from Wildwood, check out one of Mass Audubon's day camps throughout the state.

Mass Audubon's summer camp programs give children the opportunity to explore our wildlife sanctuaries and learn about nature with the encouragement and guidance of Mass Audubon's talented and caring camp counselors and professional natural history educators. Each day camp designs its programs to take advantage of the special natural features of the particular wildlife sanctuary, whether it's located on the coast, in the mountains, on a pond, in a meadow, in the forest, or on a farm. Children of all ages will remember their day camp experiences for the rest of their lives. Give your child a wonderful summer spent outside hiking, wading, observing, learning, and making new friends.

Our camps are accredited by the American Camp Association. (Oak Knoll and Visual Arts Center programs are seeking accreditation for 2009).

For more information about Mass Audubon's day camps, visit www.massaudubon.org/camp.
